STRAWS Movie Site and Trailer: <http://www.strawsfilm.com>

DETAILS: Did you use a straw today? Chances are you used at least one, maybe two. The average American uses 1.6 straws daily. Plastic straws are one of the top ten most commonly found sources of marine debris. 500 million straws are used in the US every day -- enough to fill over 127 school buses daily. This award-winning documentary illuminates the negative impact of straws and other single use plastics, which pollute and inundate our waterways. This film will inspire you to make this your **last straw!**

Chairs: Kerry Linderoth, Dorian Feckl, Melissa Grieco, Gretchen Kaye-Crowley, Annalise Stack, Ann Sullivan
